Senior Software Engineer SHL (previous CEB, Gartner) 2013 - 2020 Alpharetta, Georgia

- Full stack web developer, LAMP, PHP, MySQL, MSSQL, jQuery, Ajax, Node JS
- Lead the design and development of internal support tools. Including a migration tool that moved clients from our old S2P and SODA systems to the new Talent Central platform. Developed a suite of tools that enabled our call center and triage team to modify user records and investigate and correct platform issues.
- Developed and deployed SHL.com, our corporate WordPress site on AWS. Included several custom interfaces / databases for the online product catalogue, user feedback forms and client training registration. Other responsibilities were SEO/ Google tag manager / Google analytics / AB testing / cookiebot / and security compliance.
- Designed and developed the software needed to calculate and manage the earnings of our global incentives teams. Managers were able to confirm monthly earnings then email approval PDFs to over 500 employees.

Founder / CEO Yarkii, LLC 2013 - 2021 Johns Creek, Georgia

- Created www.yarkii.com, once a Node.js clone of twitch.com now the site is transitioning into a website for sharing BTC QR codes
- Crypto mining for Virtual Citadel, managed 8 racks for GPU miners which earned 24 BTC
- Managed 250 Antminer S3 for Virtual Citadel, earning 22 BTC for the time period of Aug 2017 to Oct 2018
- Personally owned a rack for 75x 1080TI GPUs which I managed to mine alt coins, currently mining with 3080 GPUs
- Run Esty store 3D Printing and casual Amazon drop shipper
